KnowFlow AI Enterprise Specification 2026

Author: JonnadulaSaiPradeep | Email: 231fa18264@gmail.com

KnowFlow AI is a multi-document RAG platform utilizing Gemini, Sentence Transformers, and ChromaDB for high-precision enterprise question answering.

Section 1: Ingestion and Vector Search

PDF files are ingested, chunked recursively into 600-character segments,
and converted into 384-dimensional dense vectors using all-MiniLM-L6-v2.

Section 2: Gemini Grounded Synthesis

Google Gemini 1.5 Flash provides fast, hallucination-free generation with source citations.
Every answer links back to exact page numbers and document provenance.
